

Aluminum Alloy Shower Rods

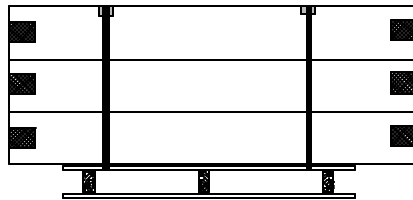

- Dayco Industries stocks aluminum shower rods in Bright (O.D. Clad) finish. The shower rods are made of welded aluminum tubing made to the ASTM B 313 standard. They are made with alloy A93105 in temper H28.

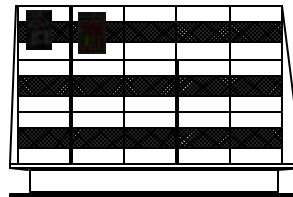

- DAYCO can provide shower rods in “Bulk” bundles so a client can sleeve and combine associated hardware with their product prior to placement in consumer marketed bags or boxes.

- DAYCO can also plastic sleeve, and pack them in cartons of either 25 or 50 pieces each, then palletized for shipment. Custom packing and Bar-Coding are also available
